

LED

Ex Code: Ex d II C T6
Standard: GB3836.1, GB3836.2
IEC60079-1:2007,MOD

Light distribution curve

Application

The Bc9700 provides operator with a powerful and energy efficient alternative to traditional hazardous location luminaires. It is ideal to be used as floodlight or spotlight at the oilfield, metallurgy, refinery, gas station, oil rig, petroleum, petrochemistry and anywhere a highly durable and efficient light source is needed that can withstand exposure to high stress environments.

Characteristics of performance

- It adopts America BridgeLux LED as light source, Taiwan meanwell brand LED driver, long life span ,maintenance free.
- The anti corrosion aluminium alloy body is powder coated for added durability and an attractive aesthetic appearance.
- The lamp is specially designed for high durability and to efficiently dissipate heat for prolonged LED life and safer operation in hazardous locations.
- The lamp is multi-voltage capable and can be operated with 90 to 305VAC.
- The strong aluminium alloy body and LED lamp design give this lamp excellent durability and resistance to vibration and impact.
- Available in several optional mounting configurations including ceiling mounting, pendant mounting, wall mounting etc.
- Equipped with adjustable locking device on the bracket that enables the operator to position lamp in any directions.
- Two cable inlet holes, enable the lamp parallel connected.

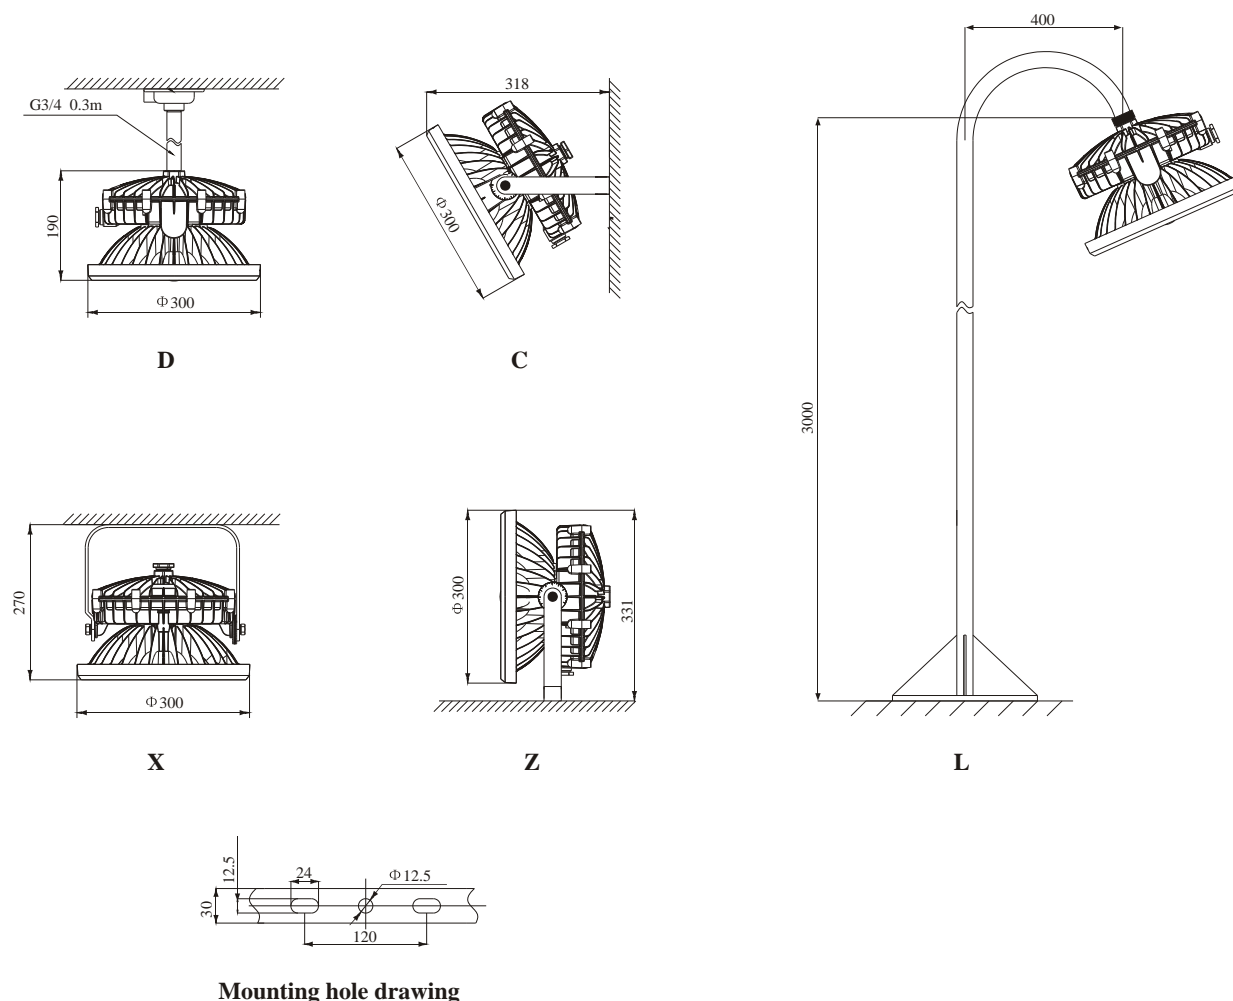

Main specification

Input Voltage	AC90 to 305V
Output Voltage	DC33-40V
Frequency	47-63Hz
Ingress Protection	IP66
Anti Corrosion Grade	WF2
Insulation Grade	I
Space Height Ratio	2
Thread	G3/4"
Leading-in cable diameter	φ 8mm - φ 14mm
Dimension	φ 300 × 190mm
Net Weight	6.3Kg
