

# ZW3520B Portable Light Tower

IP65

## Application

This unit is for use at all kinds of night work site and rescue and relief work spot.

## Characteristics of Performance

- The cart adopts the aluminum frame, light weight and easy for transportation.
- It uses digital inverter petrol generator set, with stable performance, quiet and light weight.
- Equipped with ceramic metal halide light source with long service life and high efficacy.
- The mast extension height is 1.45-2.8meters. The mast is foldable.
- Easy to transportation on bumpy road
- LED lamp is available according to customers' requirements.

## Main specification

Specification	Unit	ZW3520B
Generator rated output voltage	VAC	220
Generator max output power	KVA	1.05
Generator rated output power	VA	900
Generator DC output		12V / 8.3A
Rated Power	W	150×2
Light output	lm	11,500×2
Operation time after full fueled	h	>6
Mast extension height	mm	1,450~2,800
Beam range (1lx)	m	90
Weight	Kg	42
